Together With Other Thought Leaders from the Business Community, NGOs, and Government

This forum will seek to bridge the critical gaps between businesses capable of driving economic opportunity in Haiti and the public sector actors, including government aid agencies, NGOs, foundations, and international finance institutions, with the ability to address capacity and institution building, education, training, and infrastructure development needed for economic development. This forum will serve as a catalyst for sharing information and creating new partnerships that will bring job creating investments into Haiti.

Date: Thursday, July 22, 2010
